

# Sunshades

## Protect your sensitive equipment from solar radiations

Our sunshades are designed to provide a **temporary to permanent protection** against weather adversities for **aircraft, helicopters, drones and other sensitive equipment**.

**Fully customizable** in terms of size and height and **engineered to comply with local wind and snow loads**, our sunshades are extremely versatile and can have a **half-barrel or A-frame shape**. Easy to install on a concrete platform, with reduced civil works, they can be **self-ballasted or anchored** to the ground.

Composed of an extruded **aluminum or steel frame** and a **flame-retardant PVC-coated roof cover**, our sunshades come with galvanized steel mounting parts for extra robustness.

### Available Options:

- Inner-roof cover
- Lighting
- Side curtains
- Bird spikes
- Earthing rod
- Self-ballasting

### Load Resistance:

Calculated according to local norms

### Available shapes:

- A-frame
- Half-barrel
